

Alessandro Soccol

M.Sc. Student in Applied Artificial Intelligence

✉ alessandrosoccol@gmail.com  [alessandrosoccol](https://www.linkedin.com/in/alessandrosoccol)  [alessandrosoccol](https://github.com/alessandrosoccol)

Work Experience

University of Cagliari | Research Fellowship

Cagliari, Italy | August 2024 – Ongoing

- Developed a state-of-the-art Framework for Explainable Recommender Systems on Knowledge Graphs
- Presented a paper in the 18th ACM Conference on Recommender Systems with 1100+ participants.
- Involved in research activities including research and funding proposals.
- Mentored 1 B.Sc. student for his Bachelor's degree thesis.

University of Cagliari | Research Intern

Cagliari, IT | Sept 2023 – July 2024

- Author of the Paper: "KGGLM: A Generative Language Model for Generalizable Knowledge Graph Representation Learning in Recommendation" accepted at the **18th ACM Conference on Recommender Systems**. [Paper] [GitHub]
- Research on Knowledge aware Recommender Systems.

University of Cagliari | Internship

Cagliari, IT | July 2023 - Sept 2024

- Knowledge gained on Quantum Computing with an in-depth analysis of general Shor's Algorithms for any semiprime number.

Education

M.Sc. in Computer Science and Artificial Intelligence (AI)

Cagliari, IT | Expected July 2026

University of Cagliari

- **Relevant Coursework:** Data Mining, Information Retrieval, Complex Networks, Deep Learning, Reinforcement and Adversarial Learning, Natural Language Processing and Knowledge Graphs

B.Sc. in Computer Science

Cagliari, IT | Sept 2021 - July 2024

University of Cagliari

- Graduated with honours.
- In the top 5% students.
- Work accepted in the 18th ACM Conference on Recommender Systems [Paper].
- First graduate of the Bachelor's degree course.

B.Sc. in Computer Engineering

Gijón, ES | January 2024 - June 2024

University of Oviedo

- Won an Erasmus+ scholarship to study for a period abroad
- Knowledge gained in Network and Systems Architecture and Security of Networks and Services.

Projects

A comparison of oversampling techniques using GAN and CycleGAN | Python, Keras, Tensorflow

- Conducted a comparative study of GAN and CycleGAN frameworks to enhance model performance. [GitHub]
- Generated 1,500+ synthetic data samples to improve a binary classifier's accuracy using Keras and TensorFlow.

Spam email classification using Machine Learning | Python, Scikit-Learn, imblearn

- Built a binary classifier to detect spam emails using advanced machine learning techniques, achieving 96% accuracy. [GitHub]

Relevant Publications

Soccol, A., Balloccu, G., Boratto, L., Fenu, G., Marras, M. . KGGLM: A Generative Language Model for Generalizable Knowledge Graph Representation Learning in Recommendation. In Proceedings of the 18th ACM Conference on Recommender Systems (pp. 1079-1084) [Paper] [GitHub]

Skills

Languages: Python, R, SQL, LaTeX

Tools: PyTorch, Tensorflow, Keras, Huggingface Transformers, Pandas, Polars, Git, PostgreSQL, Docker, Git, AWS, Azure

Technical Skills: Machine Learning, Deep Learning, Data Mining, Statistics, Recommender Systems, Natural Language Processing, Reinforcement Learning, Graph Representation Learning, Data Structures and Algorithms, Knowledge Graphs
